

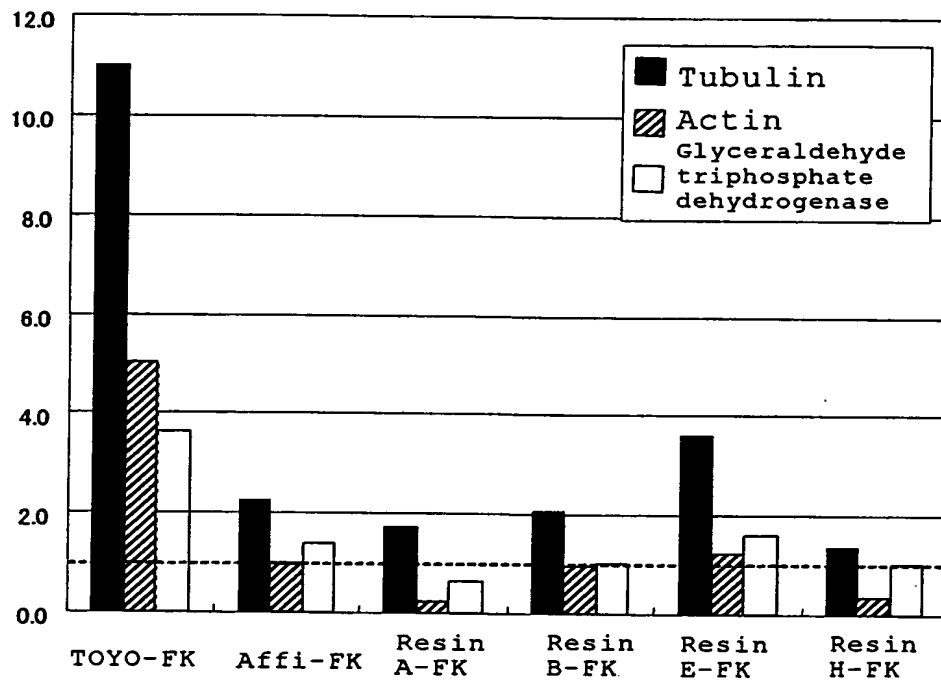

FIG. 1

Comparison of major non-specific bands relative to each FKBP12 as reference value (1.0)

Resin A-FK: poly-OH type monomer with FK506 (0.1 eq)

Resin B-FK: poly-OH type monomer with FK506 + ethyl methacrylate (1:9) copolymer resin, crosslinking agent 10%

Resin E-FK: poly-OH type monomer with FK506 + methyl methacrylate (1:9) copolymer resin, crosslinking agent 10%

Resin H-FK: poly-OH type monomer with FK506 + methacrylamide (1:9) copolymer resin, crosslinking agent 10%
